## (54) CONTAINER TRANSPORTATION SYSTEM

(57)Abstract:

**PROBLEM TO BE SOLVED:** To provide an import and export agent with procurement of an empty container allowing reduction of import and export cost in accordance with a volume of a request cargo.

**SOLUTION:** This container transportation system has a mixed loading manager server 4 capable of sending and receiving data with an import and export agent terminal 1, a container transportation agent terminal 2, and a customs agent terminal 3. The mixed loading manager server 4 is provided with a container transportation agent file storing container transportation information of a container transport agent such as an operation schedule and a container volume of a container ship, an import and export agent file storing cargo information such as quantity and classification item of the request cargo of the import and export agent, and a customs agent file storing customs information such as a customs fee of a customs agent. Import and export estimation information such as container space information and a customs procedure cost capable of reducing the import and export cost in accordance with the volume of the request cargo can be retrieved by accessing to the mixed loading manager server from the import and export agent terminal.
